

Geo - Impact Tester

- The Geo-Impact Tester is built to conform with ASTM D-5874-95, Determination of the Impact Value (IV) of a soil. This standard is used internationally
- The device measures a reaction to a falling weight in terms of Impact Value (IV) on a scale of 0 – 100 IV
- Can be used on a wide range of roading construction materials making the device a useful day-to-day pavement testing tool
- Correlation to 'inferred CBR'
- A useful 'drop height limiter' improves testing by ensuring the drop height is always 450mm
- Your Geo-Impact Tester includes:
 - rugged transit case with precision cut foam inserts
 - test ring for daily performance checks
 - 2 co-axial cables
 - full colour operators manual
 - full calibration
 - 12 month warranty
