

A high-contrast, vertical photograph of a powerful waterfall. The water is white and turbulent as it falls into a dark, deep pool. The surrounding cliffs are rugged and covered in thick green moss and lichen. The lighting is dramatic, with strong highlights on the water and deep shadows in the crevices.

PROFESSIONAL INSTRUMENTS/

UP. DOWN. OVER. ACROSS.

Look up. Look down. Look over. Look across. Topography can be a very a complicated thing. If you're in a profession that takes you into the field — forestry, geology, engineering, military — it's not just about where you're going and how you're going to get there, but knowing all the ups and downs underfoot. If finding your direction includes assessing the undulations of the land, you can look with confidence to professional instruments made by the Silva Group. When it comes to measuring the vertical, the horizontal, and angles, we bring unique know-how and experience in offering the market's most complete assortment of precision compasses and clinometers/height-meters — accuracy, reliability, quality and value that professionals can depend upon.

SIGHTMASTER LENSATIC

The SightMaster Lensatic is the traditional SightMaster model, featuring an aluminium protected sighting system which withstands the toughest conditions.

Equipped with a parallax-free, glass lens, 10x magnification sighting system in an aluminum housing. Anti-static and liquid filled capsule for optimal dampening of the Sightmeter card.

Equipped with an aluminum compass card with precision scale and a top scale for direct readings on the top of the capsule at the lubber line. Sapphire-jewel bearings for friction-free movement of the card allowing fast and accurate readings.

Accuracy: $\pm 0.5^\circ$ from true magnetic course with precision sighting, $\pm 1.0^\circ$ from true magnetic course with direct reading at the lubber line on top of the capsule.

Art. No. 73100-0001

CLINOMASTER LENSATIC

Art. No. 73500-0000
(CM 360% LA)

7 318860 178771

The Silva ClinoMaster is a hand-held instrument for measuring vertical angles. The ClinoMaster Lensatic is the traditional Clinometer model featuring an aluminium protected sighting system for withstanding the toughest conditions.

Equipped with a parallax-free, glass lens, 10x magnification sighting system integrated into the aluminum housing. Anti-static and liquid filled capsule for optimal dampening of the clinometer card.

Equipped with an aluminum clinometer card with a precision scale and a top scale for direct readings on the top of the card. Sapphire-jewel bearings are used for friction-free movement of the card, allowing fast and accurate readings.

Accuracy: $\pm 0.25^\circ$ from true angle with precision sighting, $\pm 1.0^\circ$ from true angle with direct reading at the lubber line on top of the card.
